Hi Ryan,

Following up on my voicemail from a few minutes ago. Hope you are well!

Thanks,

**Chris Robertson, AICP, LEED AP**

Vicki

As we discussed yesterday, my client is building a residential project across the street from the senior center / canyon school. The school does not want to relocate during construction after all, as the permitting and licensing to move the school is too complicated. We are working with the school to minimize any construction impacts on them. The school had a wonderful idea, they currently are sharing space with the senior center on Franklin and Las Palmas. There is yard space with grass, concrete and shade behind the senior center that no one utilizes – see attached photos. We, the school and the council office would like to know the process to take down the cinder block walk giving the school access and open up for their use. The school and council office have a great relationship with the director of the senior center so they could work out how and when this area could be used. The school has insurance to use the entire city property. What would be the process to remove the wall and possibly put up some chain link fencing at the other end to keep the kids off the shuffle board court. Is this something the city could do quickly? please advise who and how we could make this happen, we believe it would be a win win for everyone.

Also, let me know what staff in Rec and Parks handles these type of requests.

As always, greatly appreciate your guidance.

Renee
